

Director of Financial Planning & Analysis

I am seeking an individual to join a high growth telecoms business as Director of FP&A. The role will report into the CFO and have the following responsibilities:

- Develop and maintain the annual operating budget for the head office and subsidiaries,
- Liaise with sales, operations and other internal staff to gather relevant information,
- Provide re-forecasts on a regular rolling basis as necessary,
- Integrate the budget with, develop and maintain the long-range financial plan,
- Assess and provide input on funding requirements and structures,
- Support the CEO (Canada) and CFO (UK) in fund-raising efforts including both debt and equity offerings,
- Build reporting templates utilising the latest tools to provide timely management information,
- Integrate with accounting reports and systems
- Model multi-country project roll-out, implementation and funding
- Liaise with external advisors, banks and intermediaries as required

Qualifications:

- 5-10+ years of financial modelling and analysis
- Good presentation and communications skills
- Excellent excel modelling skills
- Understanding of accounting principles and treatments, and taxation
- Able to work under strict timelines,
- Previous experience in telecoms, equipment manufacturing and/or network operations a distinct advantage
- Ideally English and French language skills

We are a high growth provider of rural mobile network equipment and managed services. We allow Mobile Network Operators to extend coverage in sparsely populated and difficult to reach areas. Our technology has low up-front costs as well as low Total Cost of Ownership (TCO), managing connectivity with renewable energy and IP that allows efficient use of satellite and other technologies. We are publicly traded and have recently signed a contract valued at over USD 400 million for a deployment in sub-Saharan Africa. With ambitions to grow in other regions globally we are a small but nimble company that is building a leading team to take advantage of a rapidly evolving market opportunity.

The position can be based in EMEA or Canada. The CFO is based in the UK.
