

Head of Logistics

Full-time

Employment status: Permanent

Company Description:

NuRAN is a specialized telecommunications company dedicated to meeting the growing demand for wireless network coverage in remote and rural areas worldwide. Through its affordable solutions supporting 2G, 3G, and 4G technologies and its innovative "Network As A Service" (NaaS) business model, NuRAN builds, optimizes, and manages rural connectivity expansion. NuRAN's mission is to enable over one billion people to communicate effectively over long distances. Our commitment, combined with our ethical and ambitious values, guides the company in its mission to connect the world.

Job Description:

The Logistics Manager is responsible for overseeing the company's entire logistics flow. They ensure the optimization of logistics processes to guarantee an efficient and uninterrupted flow, while meeting cost, quality, and delivery objectives. The Logistics Manager works closely with purchasing, production, and sales teams.

Key Responsibilities:

- **Transport Organization:**
 - In collaboration with production, support the planning and review of the production schedule to account for delivery times.
 - Plan transportation operations for incoming and outgoing flows.
 - Select transportation providers and negotiate rates and deadlines.
 - Ensure compliance with transport documents (customs, insurance, etc.).

- **Logistics Operations Coordination:**
 - Optimize logistics processes to reduce costs and improve lead times while applying best ESG practices.
 - Oversee the preparation and shipment of orders, ensuring on-time delivery.
 - Implement performance indicators to track operational efficiency (KPI).
 - Manage schedules and ensure compliance with safety rules and quality standards.
 - Train and develop team members' skills.

- **Budget Monitoring:**
 - Manage the logistics department budget, control expenses, and propose improvements to optimize costs.
 - Monitor transport, storage, and packaging costs.
- **Continuous Improvement:**
 - Propose and implement actions to improve the supply chain.
 - Ensure optimal use of logistics tools and technologies (WMS, TMS, ERP).
 - Stay updated on the latest developments in logistics practices and technologies.

Required Profile:

- **Education:**

Degree in Logistics, Transport, or equivalent.

- **Experience:**

- 3+ years of experience in logistics management or a similar position.
- Experience in international logistics (experience in Africa is a plus).

- **Skills:**

- Proficiency in Office Suite and ERP software (Odoo is a plus).
- Knowledge of regulations related to transportation and inventory management.
- Ability to solve problems proactively and work under pressure.

- **Languages:** Fluency in French and English.

- **Specific Requirement:** Ability to work early mornings (shift starting no later than 7 a.m.).

NuRAN offers:

- A healthy and friendly work environment, with hybrid or remote work options.
- Flexible hours for a better work-life balance.
- Autonomy, professional development, creativity, and flexibility.
- Supportive management.
- The possibility to work from anywhere in the world.
- A versatile, dynamic, and innovative team.
